

Figures

Figure 1: A line graph showing the relationship between the concentration of a solution and its refractive index. The x-axis represents concentration in g/dL, ranging from 0 to 10. The y-axis represents refractive index, ranging from 1.00 to 1.10. The data points show a linear increase in refractive index with increasing concentration, starting from approximately 1.00 at 0 g/dL and reaching about 1.08 at 10 g/dL.
